Dureke Sanchez

My name is Dureke and I'm in my last year at CSU, taking courses online. I hope to use my computer science degree in software development. My hobbies include books, with a side of video games.

- E-mail: dureke.sanchez@colostate.edu
- NetID: dreamfox
- Github Username: Dureke

Ethan Turner

I'm Ethan, and I'm entering my senior year, hoping to graduate by next fall. I'm majoring in computer science with a focus in networking. I enjoy team projects and hope to have a great semester.

Matthew Johnson

John Hess

Hi, my name is John Hess. I am also a senior Computer Science student at CSU. I've had a profound interest in technology as long as I can remember and will graduate with a bachelor's in software engineering this spring. I am from Littleton Colorado but get to the ocean any chance I get. Some of my hobbies include working out, fishing, video games, and working on my car. One of my proudest accomplishments is my 350z that I have completely redone with a body kit, vinyl wrap, interior, etc. [Pictured here](#)

Samuel Huestis

Hi, my name is Sam and I am a senior here at CSU and I study online. I really enjoy problem solving and critical thinking. I enjoy things like running and hiking with my family in my free time. One of my proudest accomplishments have been running a marathon, being in the Army and having a family.

GroundRules

John H edited this page 2 weeks ago - 10 revisions

Ground Rules

Goals

- To deliver a finished, high quality product
- To meet deadlines with confidence
- To impress clients and shareholders with project advance
- To foster a productive environment by following the group

Scrum

- Scrum will be held by in person students who are able to
- Online students should report their story status, blockers
- lecture is held
- The goal of scrums will be to capture the teams progress
- experiencing
- Each team member is expected to know the story title and
- working on

Meetings

- Meetings are to be held every Tuesday, 6:30 PM MST
- This meeting time is flexible and is subject to change
- Meetings are done through Microsoft Teams t05 channel

Communication

- Communication takes place on Microsoft Teams
- We will also communicate in weekly meetings and scrums

Values

- To create high quality code
- To ensure all code is readable and self-explanatory
- To communicate with stakeholder and between ourselves
- To not commit directly to main

Conflict

if an issue arises we will use these methods:

- Open and respectful communication
- Try to see things from other perspectives before jumping
- Be active at listening without interruptions
- If we can't resolve it ourselves, we'll ask a neutral team m
- Focus on finding solutions and not blaming
- Once we resolve a conflict, we'll document what we agree

Story	Component	Estimate	Priority	Owner
User Profile	User Management	3	Must	John
Chess Gameplay	Game Playing	5	Must	John
User Register and Unregister	User Management	2	Must	Sam
User Login and Logout	User Management	2	Must	Ethan
New Match Option	Game Playing	2	Must	Matthew
Settings Capabilities	Game Management	2	Should	Matthew
Invite Another User(Multiple)	Game Management	2	Must	Sam
Accept and Reject Invitation	Game Management	1	Must	Sam
Asynchronous Capabilities	Game Management	2	Should	Ethan
Quit/Abandon Game Option	Game			
Player/Match History	User M			
Save and Exit Game	Game			
End of Match Info Screen	Game			
On-going Game(s) Screen	Game			

Inspection (INVEST)

- Independent: Core: Yes, starting a game, requires New Match
- Negotiable: Yes
- Valuable: Yes
- Estimable: Yes, core. Additions can vary.
- Small: Yes
- Testable: Yes, might be inconvenient without a UI

— — —

Hmmm. She could create a new **match** (so she can play it). Since she can't play by herself, she should be able to invite another **user** to join the **match**. Perhaps she could send more than one **invitation**, something like "first come, first served", so the first **user** accepting the **invitation** will be the one joining the match. Is that possible?? I guess a **user** also needs to be able to reject an **invitation**, so it would be nice if the **user** who sent it received a **notification**.

Game

Responsibilities

- Have the ability to be ran in multiple instances.
- Will contain all of the necessary components of a game.
- Users will have the ability to exit a game at any time.

Collaborators

- [Match](#)
- [Platform](#)
- [Rules](#)

Inspection Comments and Resolution

Removed user, profile and history as collaborators. Removed a bullet point regarding updating user history.
